SUMMARY

I am a hardworking and result driven young man, with the desire to learn more.
I have the ability to work well both individually and in a team, which has taught me patience, friendship, open-minded with problem solving strategies.
I enjoy learning new things everyday which sharpens my skills.
I am a passionate full-stack developer with some experience on designing and developing client-side, server-side software and desktop applications.
Looking for opportunities to learn new technologies and to grow my technical skill set in a team-based environment.

EXPERIENCE

Software Engineer   Sep '22 — Present
Gijima   Midrand, South Africa (Remote)

My responsibilities are based on 2 applications, one application is a Equipment Booking System developed on Visual Studio Code using PHP Laravel and MySQL. Which uses CRUD method. 2nd application is Microsoft Access application that users use to do, Quotes, Purchase Orders, Billing Request, Analysis Request and more for our Clients. It uses Visual Basic and MS SQL. The application has ability to give Reports on Monthly basis.
